MOHAMED WARIDI BENNOUNA

Scrum Master Intern • M.Eng. Candidate in Technology Project Management • B.Eng. Software Engineering

Montréal, QC, Canada • 00bmed255@gmail.com • +1 (514) 660-6470 • linkedin.com/in/mohamedwb • github.com/simo255

PROFESSIONAL SUMMARY

Master's student in Technology Project Management at Polytechnique Montréal and Scrum Master Intern at Desjardins (FinOps / Cloud Centre of Excellence). Combining a solid Bachelor of Software Engineering with hands-on development experience across enterprise digital platforms (ECCC, Krafton, Ludia), I bridge deep technical engineering rigor with Agile facilitation, delivery workflow optimization, and cloud governance.

EDUCATION

Polytechnique Montréal — **Master's in Industrial Engineering (Technology Project Management)** **Aug 2025 — Present**

Specialization: Technology project governance, systems engineering, project planning & scheduling, risk & team leadership.

Key Courses: Tech Project Processes & Configuration, Planning & Monitoring, Project Financing & Budgeting, Team Leadership, Software Quality.

Polytechnique Montréal — **Bachelor of Engineering (Software Engineering)** **2020 — 2024**

Comprehensive curriculum: Software architecture, OOP, distributed systems, database management, algorithms, and QA practices.

PROFESSIONAL EXPERIENCE

Desjardins — **Scrum Master Intern** **Sep 2026 — Present**

FinOps / Cloud Centre of Excellence (CCoE) • Montréal, QC (Hybrid)

- Supporting the team in Agile/Scrum ceremony facilitation, impediment removal, and continuous delivery flow improvements.
- Participating in Cloud Centre of Excellence initiatives and promoting cloud financial management (FinOps) best practices.

Environment and Climate Change Canada (ECCC) — **Software Developer** **Jun 2024 — 2024**

Digital Services Branch • Montréal, QC (Hybrid)

- Developed and maintained enterprise software solutions with C#, Next.js, Azure Functions, Dynamics 365, Dataverse, and Power Platform.
- Built automated Power Automate workflows and custom JavaScript components to enhance user experience and regulatory operations.
- Investigated and resolved defects across distributed services and Azure SQL databases; collaborated with business analysts in an Agile setting.
- Developed model-driven Power Apps and integration components to streamline business workflows.

Studio KRAFTON Montréal — **Gameplay Programmer — C++ (Internship)** **May 2023 — Aug 2023**

AAA Project Unreal Engine 5 • Montréal, QC (Hybrid)

- Implemented gameplay mechanics in C++ and collaborated within a cross-functional team in an Agile environment (Jira, Confluence).
- Designed a generic spatial detection system using Octree structures to improve computational performance significantly.
- Authored technical documentation in Confluence to streamline onboarding and maintain architectural clarity.

Ludia — **Gameplay Programmer — C++ (Internship)** **May 2022 — Aug 2022**

Jurassic World: The Game (+20M users) • Montréal, QC (Hybrid)

- Developed and optimized gameplay features and dynamic UI components using C++, JSON, and VBA.
- Authored technical documentation to support code maintainability and cross-discipline collaboration with artists and designers.

AG-CONNECT-SOLUTIONS — **Team Lead & Assemblies Co-host** **Nov 2021 — Jun 2024**

Montréal, QC • Operations & facilitation

- Led a team of co-hosts, organized team scheduling, and co-hosted 200+ virtual and in-person general assemblies (100+ attendees).
- Facilitated decision-making workflows, handled live resolutions, and onboarded and trained new team members.

SELECTED PROJECTS

Algorithmic Trading & Autonomous Quantitative Platform *(Python, FastAPI, Angular, Hyperliquid)* **Ongoing**

- 24/7 automated live trading platform (Hyperliquid, Extended, WebSockets) with dynamic risk controls, Position Guardian, and conditional stops.
- Autonomous quant research framework (AI agents) for systematic strategy discovery, signal screening, and out-of-sample validation.

Scrabble — Cross-Platform Web & Mobile App *(TypeScript, Angular, Node.js, Socket.IO, Firebase)* **2023**

- Developed a real-time multiplayer application in a 5-developer team with Express microservices, Socket.IO, and Firebase auth.

Autonomous Agent Pipeline News-to-Instagram *(Python, AI Agents, Automation)* **Ongoing**

- Autonomous multi-agent pipelines that gather, synthesize, and publish news content across social media without manual intervention.

betteResume *(Chrome Extension, JavaScript, LaTeX, LLM APIs)* **2024**

- Built a Chrome extension automating tailored LaTeX resume generation in Overleaf using LLM APIs with client-side key encryption.

SKILLS & TECHNOLOGIES

Methods & Agile:	Agile, Scrum, FinOps, Jira, Confluence, Azure DevOps, Project Governance, Impediment Removal, Facilitation
Languages & Web:	Python, C#, C++, TypeScript, JavaScript, SQL, Java, HTML/CSS, Node.js, Angular, React, Next.js
Cloud, DevOps & Tools:	Microsoft Azure, Power Platform, Dynamics 365, Dataverse, Git, GitHub Actions, GitLab, Docker, Unreal Engine 5
Languages (Spoken):	French (bilingual / working proficiency), English (professional), Arabic (native)
Interests & Insights:	Quantitative finance, autonomous AI agents, enterprise Agile frameworks (SAFe)
